### 3.45 Using plants

Topic: Plants Subtopic: Habitats Activity type/skill: Question forms Literacy focus: Writing Genre: Questions

#### Objective

• Focus attention on question forms and answers.

#### What you need

• Student worksheet (see next page)

#### What to do

- 1. Look at the student worksheet and read it together.
- 2. Discuss the uses of plants with the students and elicit any knowledge and experience.
- 3. Have the students take turns to be the teacher and ask the group two questions about the text.
- 4. Write down each question on the board. Have students write down the questions at the bottom of the student worksheet.

## Activity forty-five

# Plants and people

Plants are useful to people and communities in many ways.

They provide us with food, shelter, fuel and clothes. They also help to make our environment more pleasant to look at and live in.

Plants are very important indeed because they provide us with the oxygen we breathe. Without plants there would be no life on earth.

Some plants are not useful to people. Some are poisonous and some cause diseases. Unwanted plants (weeds) cause problems for gardeners and farmers.

Most plants though are important in our communities. They provide us with many things we need and make the world pleasant to live in.
