

## 4.27 Recognising time expressions

**Topic:** Measurement

**Subtopic:** Time

**Activity type/skill:** Bingo

**Literacy focus:** Vocabulary

### Objective

- Recognise time expressions.
- Relate spoken time expressions to written forms.

### What you need

- Student worksheet (see next page)

### What to do

1. Write about 15 times on the board (for example, 11.30am) and have students choose any nine and write one in each box in the first card on the student worksheet.
2. Call out the times from the board in random order for students to put a line through the time on their card. The first student with all times crossed out wins.
3. Play again using dates (for example, 12 June) using the second card.

### Extending the activity

- Visit websites for additional practice in talking and writing about time in English.

## Activity twenty-seven
