

## 6.45 Spelling target vocabulary – energy sources

**Topic:** Conservation

**Subtopic:** Energy sources

**Activity type/skill:** Missing words

**Literacy focus:** Vocabulary

### Objective

- Focus on the form and meaning of target words.
- Say and spell target words.

### What you need

- Student worksheet (see next page)

### What to do

1. Have students work in pairs. Fold the student worksheet down the centre line so Student A can only see one side and Student B the other.
2. Explain what to do:
  - Student A reads out the first sentence on their sheet.
  - Student B listens and compares it to their sentence.
  - Together, they work out and spell to each other if necessary the missing words and write them in the spaces. They must check by spelling and rereading the sentences to each other that they have a sensible sentence.
  - Student B reads their sentence 2 and so on.
3. Mark the sentences by giving a mark only to correct spelling. Make it a competition between pairs.

### Extending the activity

- Write the sentences on the board and have the students come and insert words.

## Activity forty-five

1. Oil and coal are \_\_\_\_\_ but natural gas is quite a clean fuel.

1. Oil and coal are dirty but natural gas is quite a clean \_\_\_\_\_.

2. Some power stations \_\_\_\_\_ coal to make steam.

2. Some power stations burn coal to make \_\_\_\_\_.
